# COMPACT

MURR ELEKTRONIK

stay connected

- Quick and easy installation
- No programming required
- Simple device replacement
- Variety of models available
- Prioritization of PROFINET telegrams
- 1,000 Mbit/s (Gigabit)

UNMANAGED GIGABIT SWITCHES – THE DATA WORKHORSES

Murrelektronik's unmanaged Gigabit switches are the data workhorses in networks. Solidly covering basic functions. They connect network devices with each other and forward data as packets. In doing so, they shine with gigabit data transfer speeds.

Our Unmanaged Gigabit Switches are designed for use in even the tightest control cabinet. Features include:

- Robust plastic housing
- Narrow design
- Less than 150 mm high
- DIN rail mounting

Unmanaged 4 Port Switch 1,000 Mbit/s	**58813**

Description	Part-No.
Unmanaged 6 Port Switch 1,000 Mbit/s	**58814**

Description	Part-No.
Unmanaged 8 Port Switch 1,000 Mbit/s	**58815**

MADE IN GERMANY

Xelity switches are produced at our Oppenweiler headquarters. This guarantees a high-quality product as we strive for a zero-defect strategy in all production areas. We are continually investing in machines, systems and quality control in order to further develop and improve our technical processes. Through supplier integration, robust processes and implementation of process optimization measures, we create the world-class, technologically advanced products you have come to know and love.
